EHR and the 2009 STIMULUS - ARE YOU READY?

As you are probably aware, on February 17, 2009, President Obama and Congress passed H.R.1 and it became law. This bill provides for financial stimulus money to be paid to Physicians who purchase a certified EHR software (also referred to as EMR), and show meaningful use of the software. The requirements for "certified EHR" software and "meaningful use" are to be published by the HHS by December 31, 2009. The first stimulus payment to physicians of $18,000 can be applied for in either 2011 or 2012. Tele Comm has been deeply involved in this process, and beginning January 1, 2010, we will be publishing our list of EHR companies that meet the criteria to qualify for the stimulus money. In addition, we will be holding seminars through out 2010 to help offices select the right EHR for their practice. The absolute best advice we can provide offices at this time is to **WAIT** for the HHS publication, and let Tele Comm assist you in choosing the best EHR solution for your office.

TCU - Tele Comm University

Beginning January 1, 2010, Tele Comm will launch **TCU.** It's a small private University with small classes and lots of personal instruction. We will be offering hands-on computer training on a variety of topics from basic computer operation to WORD and EXCEL. Also, there will be a complete schedule of classes on all aspects of the TCXMED medical billing software. Although we don't have a football team, we do have a mascot. Visit our website, find the mascot, and email the mascot's location to us at tcu@telecommcomputersystems.com. The first ten correct answers will receive a cash prize of $20, courtesy of **TCU**. Be watching for our list of classes on our website and in our newsletter. If you have a class request, email it to tcu@telecommcomputersystems.com.

Windows 7 and 64Bit - We have it all!

Our new price lists features the latest in system configurations. All computers we sell are 64-bit systems, include Windows 7, are built with the highest quality components, and include many premium features such as redundant hard disk drives, wide screen monitors, and wireless keyboards and mice. With Tele Comm's current price stimulus, there has never been a better time to upgrade you office system!

Managed Services - New from Tele Comm

Managed services is the practice of transferring day-to-day related management responsibility as a strategic method for improved effective and efficient operations. Tele Comm now offers Managed Services for computer hardware. As a managed services client, Tele Comm will provide support for all your computer hardware and infrastructure needs. Additionally, if you have purchased your hardware from Tele Comm, we will include all repairs at no additional charge. Call today to get a quotation for these services and be prepared when it comes time to install your EHR software.

Reclaim your space with Tele Comm paperless invoices!

Go paperless and free yourself from mailed invoices. No more shredding, searching, or boxes full of unwanted paper. **Enroll Today!**
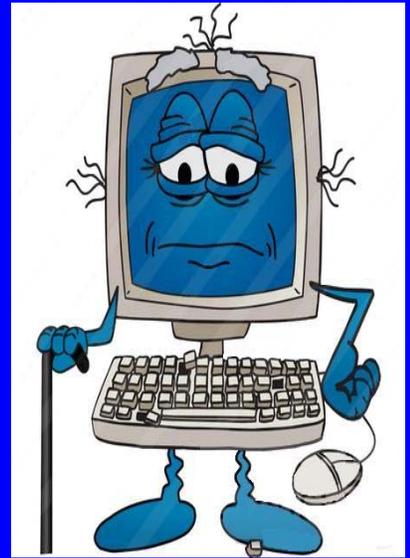

Is your computer showing signs of age?
Maybe a little grey hair and loss of vision?
Or is it giving you grey hair with slow speed and lockups, and
causing you to lose your vision with that small blurry screen?

Well...there has _never_ been a better time to upgrade your hardware.
Microsoft has released Windows 7, the latest and greatest operating
system and it is standard on all computers Tele Comm sells.

For a limited time, Tele Comm is providing a stimulus purchase incentive
on all systems. Call today so you don't lose out on this opportunity.
Move up to more power, more speed, and a big screen.
