New Internet Backup System

Tele Comm has upgraded our **TCXBAK** on line backup system with many new features. We have joined forces with a world class data storage company that has a 60 year history of records management, and currently services over 120,000 clients. This high technology is now integrated with our own private label **TCXBAK** product to produce a secure, sophisticated, and reliable off-site backup. It can be used for servers, office workstations, and even home computers. Studies have shown that over 10% of computers crash and suffer severe data loss. Don't go another day without a secured off-site backup of your data. Sign up by March 31, 2011 and we will waive the \$99 setup fee, and give you 12 months for the price of 11 months. Protect your data and your business and don't delay, call us today: **1-800-689-8100**.

Tele Comm Bill Pay Service

Effective immediately, Tele Comm has initiated a free on line bill pay service. With this quick and easy service, we can email you a copy of your invoice with a link that allows you to pay us directly from your checking account. There are no fees associated with this service, and there are no commitments. You can pick and choose which invoice to pay with this service, and which to pay by paper check or credit card. This service will save time, and money spent on checks, ink, envelopes, and stamps. To get set up for this free service, all you need to do is email your request to ann@telecommcomputersystems.com. After receiving your request, we will begin emailing all your invoices to your email address.

Tech Tip of the Month

Why is my computer running so S_L_O_W_? Have you asked yourself this question lately? What was your answer? (Do you always talk to yourself?) If you are looking for an answer from someone who deals with this problem on a daily basis, then call Tele Comm. In a few minutes on the phone we may be able to diagnose and solve your problem. If additional work is required, then ask about our special "March Computer Tune-up". From now until March 31, 2011, we will come to your office, pick up that slow computer, make the necessary adjustments in our shop, and return it for only \$89, including travel time and labor. Heck, we'll even dig out that piece of donut that has been stuck under the ENTER key since last week.

Do You Need a UPS?

We are not talking United Parcel Service...we are talking Uninterruptable Power Supply. In it's best form, it is a battery powered system that supplies filtered power to your computer as it is continuously recharged by the electrical power from your wall outlet. If you experience periodic power outages or brown-outs, you may need one. Call us and we can help you pick out the right system for your office.

Tele Comm Times Special

Due to the overwhelming response last month, we are extending our claim form special one more month through March 31, 2011. If you purchase five (5) reams of Laser CMS 1500 Claims forms, you will receive (1) ream for free. Place your order by phone at 800-689-8100, or email Ann at: ann@telecommcomputersystems.com

Free Netbook

How would you like to get a free netbook from Tele Comm? All you have to do is register for the contest, use the clues to find the answers, and be the first one to get all the answers correct. Registration is now open and the rules are as follows:

1. The contest is only open to client offices in good standing with Tele Comm
2. Entrants must register to participate
3. Only one entry registration is allowed per office
4. Registration ends at midnight 03/31/2011
5. In the case of a tie, a coin toss will decide the winner

Registration is open now. To register, send an email to netbook@telecommcomputersystems.com with the following information:

1. Office name
2. Entrant name
3. E-mail address

In the April TCTimes, the first clue will be given with instructions on how to respond. So, get ready, get set, REGISTER!

Free EHR Trial

Are YOU ready to start using EHR software? This should be a decision YOU make based on YOUR needs. Don't be pressured by a Hospital, a high pressure salesman, or any organization, like the Government, that dangles a carrot in front of you that may not exist, or threatens you with a stick they may not use. Purchasing an EHR system is a huge commitment that requires a lot of forethought. That is why only about 7% of Physicians have purchased an EHR, and why about only 30% of the EHR systems purchased are successful. When you are ready, Tele Comm can help you acquire a 2011-2012 ONC-ATCB Certified EHR system that integrates your billing, charting, and electronic prescribing, and fits your practice. There are many styles of systems to choose from, and prices vary greatly. When YOU are ready, call us today at 1-800-689-8100 to get started.

The Adventures of Scary Gary, the EMR Salesman

The ever persistent, ever annoying, ever over-stating, and ever under-estimating EMR salesman, Scary Gary is out there to get you. Beware!
